

Term 1 Education News

www.rotokare.org.nz

Rotokare's Education Programme is now fully operational, after a successful year last year; we are expecting great things in 2011. The programme is unique in Taranaki and allows students to experience what pre-human New Zealand may have been like. Nowhere else in Taranaki can students get the opportunity to see amazing native plants and animals. All the while learning and building on key curriculum concepts in the science, social science and technology learning areas, through hands-on activities outside the classroom.

*****NEWS FLASH***** Taranaki's own kiwi crèche, here at Rotokare Scenic Reserve!

All of the hard work has paid off; we are now offering kiwi chicks a safe predator-free place to call home.

Kiwi chicks stay at Rotokare until they reach 1.2kg, a size that allows them to fight off their number 1 predator – stoats.

Currently there are 6 kiwi chicks living at Rotokare.

Howie, our newest arrival.

St Josephs (Stfd) students became detectives for the day, deciphering clues such as animal footprints to learn more about conservation.

New, Unique and Innovative Rotokare Environmental Education Programme

- ✓ Hands on learning experiences, about, for and in the environment.
- ✓ Strong links to the National Curriculum, with high quality classroom resource packs available.
- ✓ Broad and flexible units for early childhood through to senior secondary students.
